LinenHelper *Net*

Standard Features

Web Based Application

Whether you manage linen for a hospital, nursing home, or hotel, our powerful, web based distribution and tracking tool delivers an exceptional level of service.

Using LinenHelper*Net*'s data input and reporting features, linen managers can easily maintain detailed records of item quantities, weights, and charges for order restocking. Your personnel can use this information to pinpoint cost and usage excesses by order, department, or customer.
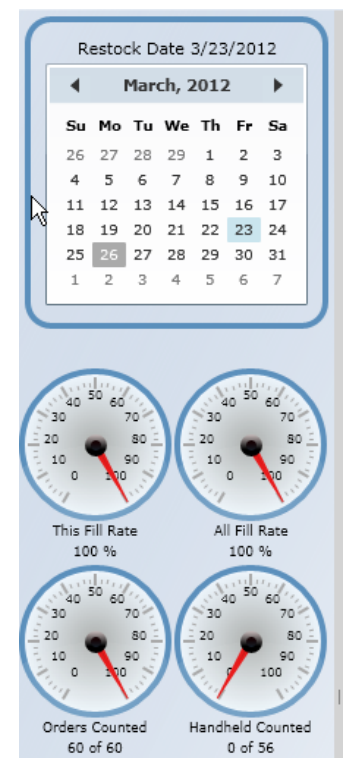

LinenHelper*Net* employs restocking information in a sophisticated, easy-to-use fashion to help you get your job done faster. For example, LinenHelper*Net* can use today's restocking quantities to generate tomorrow's bulk linen requirements.

We have fashioned LinenHelper*Net* to accommodate even the busiest, most complex facilities. Whether your facility utilizes outside linen support or an on premise laundry, LinenHelper*Net* is sure to make your daily accounting procedure quicker and easier than ever imagined.

LinenHelper*Net* can be linked to a LinenMaster*Net* enabled laundry to generate daily delivery requirements.

With LinenHelper*Net* you can:

- Access your information from any workstation within or outside your facility using any of the most popular web browsers
- Define user privileges for specific application functionality
- Enter daily linen counts, calculate item requirements, print daily and weekly picking forms, and globally adjust par or required quantities based on available linen stock
- View dashboard gadgets to quickly analyze daily cart stocking status
- Create and view dynamic usage and utilization reports quickly and accurately, based on the customized information you select.
- Compare patient day information to target data (National Averages, department goals, etc) you provide.
- Run department reconciliation reports to facilitate the charging of departments based on their linen usage
- Email and save reports in PDF or Microsoft Excel formats.
- Create graphs and/or charts from any report
- Utilize packs and procedures to customize product combinations that meet your requirements.
- Manage circulating inventories by injecting and retiring linen and recording physical inventory quantities.
- Track receipts and deliveries to and from the linen room and laundry by items and/or weight. Monitor soil to clean, as well as receiving and distribution accuracy through customized linen room reports.

LinenHelper *Net*

System Requirements

Required for optimal access of your
LinenHelper*Net* site:

- Web Browser
- Microsoft Silverlight
- Screen Resolution set to 1024 X 768

Recommended for report and graph viewing and
printing:

- Adobe Acrobat Reader
- Microsoft Excel

Handheld Interface

Enjoy the convenience of an Android phone or tablet or Pocket PC
mobile device to reduce the time and labor needed to enter restocking
information and increase data accuracy for your entire facility.

Sync the device through the facility's wireless network, 3G services
(Android only) or an ActiveSync connection through a workstation
(Pocket PC only).

Print to a compatible wireless printer using Bluetooth technology.
Utilize the pick list to replenish your cart inventory.
